

Fitness Trail Datasheets

Recommended Compliant Grass Tiles For Fitness Trails

The following table can be used as a guideline for the number of Compliant Grass Tiles (SS500) that are required to cover the area surrounding each type of fitness trail station.

Listings on the following pages assume installation is into existing Well Maintained Grass / Lawn with a 'Free Height of Fall' of 1.5m.

Equipment with a 'Free Height of Fall' of less than 1.0m does not require an impact absorbing surface.

Compliant Grow Through Tiles - 'Mats' are tested to offer an increased Free Fall Height of 3.0m when laid onto existing Well Maintained Grass / Lawn

Alternative surfaces 'Free Heights of Fall' are:

Concrete, Stone & Macadam \leq 1.0m, Topsoil \leq 1.2m, Sand, Gravel, Bark & Woodchip \leq 2.0m - 3.0m

* indicates tiles are not installed directly beneath equipment.

In accordance with the Company's policy of continuous development, Boyd Sport & Play Ltd t/as sportsequip.co.uk reserve the right to alter or amend specifications without prior notice.
